## STRENGTHS

Learner • Communicator • Diligent  
Innovative • Ambitious

## SKILLS

### Front End:

Shopify (Liquid)  
JavaScript ES6  
ReactJS  
NextJS  
jQuery  
Bootstrap  
HTML5  
CSS3  
SCSS

### Back End:

Node.js  
MongoDB  
PostgreSQL  
ExpressJS

### Additional Skills:

RESTful APIs  
Unit testing  
Heroku  
mLab / Mongo  
Figma  
Adobe Tools  
Affinity Tools  
E-commerce Management

### Additional Tools:

Mocha  
Chai  
Webpack  
Git  
GitHub  
Jest

## ABOUT ME

I am a Software Engineer with extensive background in e-commerce. More specifically 10+ years experience, with 7 of those years managing and maintaining Shopify stores. I have experience in Javascript, ReactJS, ExpressJS, NodeJS, PostgreSQL, MongoDB, SCSS and serverless technologies. I am an extremely hard-working problem-solver that puts performant and high quality code first and I love learning new technologies.

## WORK EXPERIENCE

### FULL STACK DEVELOPER

Independent Contractor // September 2020 - Current

- Javascript, HTML, CSS, SCSS, SQL, Shopify, Liquid, Wordpress, ReactJS, NextJS, Svelte

- Generating repeat clients by providing exceptional code and consulting primarily for e-commerce companies on Shopify.
- Building tools and solutions for these companies at their request, meeting with owners to brainstorm ways to streamline processes within their business.
- Learning new technologies by rebuilding tools, building custom themes and small apps. Using React, Webpack, and serverless technologies to extend Shopify frontend.

### FULL STACK DEVELOPER

Thinkful Coding Bootcamp // April 2020 - September 2020

- NodeJS, ExpressJS, PostgreSQL, MongoDB, ReactJS, Javascript ES6, HTML, CSS, SASS

- Provided leadership and organization to multiple teams working on small-medium web app projects.
- Improved upon and mastered many industry best-practices including semantic HTML, reactful design, and agile methodologies.
- Deployed multiple small to medium sized web apps using both modern and tested technologies like ReactJS, SQL and no-SQL databases, and NodeJS.

### IT CONTRACTOR

Dirt Masters LLC // January 2018 - February 2020

- Javascript, HTML, CSS, SQL, Shopify, Wordpress/Woocommerce, Bigcommerce

- Developed and deployed an automated system to sync products to the e-commerce system in use.
- Provide consultation and installation of e-commerce and storefront services.
- Supported new technology deployment and provided maintenance on current systems including e-commerce, security, and Amazon systems.

## RECENT PROJECTS

### Sport Formula - Webpack, Liquid, jQuery, Bootstrap, Javascript

◦ <https://sportformula.com>

Freelance client that sells their own brand of vitamins and supplements utilizing Shopify.

- Made modifications to their pre-purchased theme at the request of the owner. Modifications were made based on the look of a similar site in another niche.
- After maxing out the performance, I was tasked with remaking the current theme from scratch, to be as performant as possible and to make future iterations easier.
- Integrated serverless functions to handle data fetching to Shopify API and Recharge API.

### Biohacking Theme - Shopify, Liquid, Webpack, Javascript, SCSS,

◦ No Link Provided

Shopify custom theme commissioned by growing agency to sell to their clients.

- I was given a very advanced design and a 1 month deadline to develop this theme from scratch.
- I used Webpack to codesplit the Javascript, and to compile the SCSS to CSS, then codesplit that as well.
- I was able to develop the theme in the time given, and shortly after rebuilt the theme to fit OS2.0 standards.
